

**OutdoorAudio**

Thank you for purchasing a DeckTunes® Two unit with Sirius Satellite Radio Receiver

Your receiver is installed and connected. To start enjoying it:

1. Mount your antenna in a location in where it has an unobstructed "view" of the sky.
2. Route the antenna cable into the DeckTunes® enclosure through the same fitting as your speaker wires.
3. Connect the antenna to the receiver. To do this, simply push the connector end of the antenna wire onto the jack labeled "antenna" located on the top of the receiver located inside the enclosure.
4. Follow the instructions in the included Sirius Installation Guide to activate your subscription.
5. To display your receiver's SID:
  - Power on your DeckTunes® unit.
  - Press the **MOD** button until **SIRIUS1** is displayed as the source.
  - Press the **TUN** button up or down until **Channel 00** appears in the bottom right corner of the display.
  - The SID will then be shown on two lines in the display.
  - You will need to record both lines of numbers as a single line for use during the activation process.

**Should you need any assistance, please contact us Monday – Friday**

**9:00 AM – 5:00 PM EST at 800-240-6845 or send us an email to:**
